ABOUT ME

I'm second year Computer Science student on Politechnika Gdańska. Currently, I'm looking for my first commercial experience, where I would have opportunity to gain hands-on knowledge.

SKILLS

C, masm x86

C++ - objective and structural programming, algorithms and data structures

JavaScript, Vue.JS, Bootstrap, SASS

Python - web development (Flask), unit tests

Java - objective programming, web development (Spring)

Docker, Git, mySQL

Linux, bash, Windows

LANGUAGES

polish - native

english - advanced

EXPERIENCE

Scientific Association member

Politechnika Gdańska

October 2024 - now

Website for Polish Red Cross

This web application was developed to assist the Polish Red Cross in migrating to an online system for managing honorary blood donor cards. It provides an interface for testing and verifying results from an OCR model that extracts data from physical donor cards.

Stack:

Vue, Bootstrap, Flask, Docker, MongoDB, Git

My role:

I was fully responsible for frontend development and also contributed to key parts of the backend, including the application's core logic.

You can find more information on the project's

[github](#) or [my website](#).

If you want to explore more of my projects, check out my [github](#)!

EDUCATION

Computer Science (full-time)

Informatyka Gdańska

2023 - now

Low-level programming (C and masm), algorithms and data structures, RESTful web services, object oriented programming (C++ and Java)
